

DECOKRIL FLEX

Waterproof Membrane

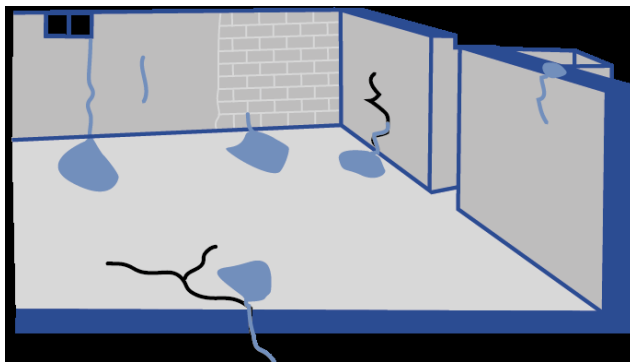

DECOKRIL FLEX is a two-component waterproofing mortar, ideal for highly flexible cementitious waterproofing works. In addition to exceptional protection, it is able to bridge small cracks through a variety of cementitious substrates.

DECOKRIL FLEX can be used in new and existing concrete structures.

Fields of application:

- ✓ **Repair and protection of structures.**
- ✓ **Swimming pools, tanks or cisterns.**
- ✓ **Hydraulic structures.**
- ✓ **Terraces and balconies.**
- ✓ **Prefabricated structures.**
- ✓ **Foundation walls.**
- ✓ **Concrete in industrial environment.**
- ✓ **Bathroom showers.**
- ✓ **Concrete protection.**

- **Fast drying, completely dry < 24 hours.**
- **Easy and clean application.**
- **Environmentally friendly.**
- **No special labeling required.**
- **No special packaging required.**
- **One fits all: above and below ground.**
- **Multiple applications possible: under tiles, terraces, basements, water tanks.**
- **It improves the adhesion of subsequent cement layers.**
- **Solidification of substrates.**

Bituminous features vs. DECOKRIL FLEX features (Waterproofing)

What are the benefits of bitumen-free waterproofing protection?

- ✓ **Alternative to bitumen-based waterproofing.**
- ✓ **Fast curing.**
- ✓ **Easy and safe to apply.**
- ✓ **Excellent bridging properties**
- ✓ **Improved adhesion of subsequent cementitious layers**
- ✓ **Solidification of the substrate.**
- ✓ **Application around the entire building.**
- ✓ **Ensures good bonding properties for subsequent application layers, such as paints or fillers**
