

MEMBRANE PUR 3G

POLYURETHANE FOR ROOF AND FACADE COVERINGS

USES

- ✓ **Continuous roofing: Liquid application membranes for new and renovation/repair works.**
- ✓ **High performance top coatings for facades.**

FEATURES AND BENEFITS

High-performance roofs coating:

- **Very low water absorption < 4.5%**
- **Excellent elasticity > 400%.**
- **High durability; excellent resistance to thermal ageing and UV rays**
- **Excellent adhesion to most commonly used roofing substrates.**
- **No adherence surface; low dirt absorption: keeping the reflective properties for longer.**

Facade coatings:

- **Vivid and durable color tones.**
- **Exceptional resistance to water and wet rubbing.**
- **Rapid hardening, which prevents stains if it rains a few hours after application.**

High sun reflectance, low absorption of solar rays.

Solar Reflectance (ASTM C1549-04)	
Solar Emissivity (ASTM C1371-04a)	
Solar Reflectance >0.65 pass GS-11	0.87
Thermal Emissivity > 75% pass GS-11	0.99
