METAL CATALOGUE - 2021

DECOLOR'S RANGE OF PRODUCTS FOR METALS

1 Component

WATER BASED

SOLVENT BASED

2 Components

WATER BASED

SOLVENT BASED

SOLVENT BASED PRODUCTS

One-component products

Primer

Multi-purpose epoxy ester primer, with zinc phosphate as corrosion inhibiting pigment.
Use: iron, galvanised, aluminium, zinc, etc.

MULTI-PURPOSE PRIMER

Primer specially recommended for maintenance works.
Use: iron.

ANTI-RUST PRIMER

Very fast drying industrial primer with zinc phosphate as corrosion inhibitor pigment.
Use: iron, steel, galvanised steel, aluminium, zinc, etc.

SHOP PRIMER

Top Coat

Alkyd enamel with polyurethane. Combines high hardness and flexibility (gloss, satin and matt finishes).
Use: doors, railings, windows, etc.

ALBOR

Fast drying alkyd enamel.
Use: metal structures, doors, railings, windows, etc.

ENAMEL S-R

Forge effect metallic synthetic enamel with antioxidant pigments, which provides a fine texture and easy cleaning.
Use: railings, windows, metal structures, etc.

DECOFORJA ANTIOXIDANT

Acrylic enamel for metallic surfaces obtaining a metallic effect finish.

DECO-METALLIC

SOLVENT BASED PRODUCTS

Two-component products

Primer

Anti-corrosion primer for ferrous and non-ferrous surfaces, both indoors and outdoors.
Use: iron, galvanised, aluminium, zinc, etc.
EPOXY PRIMER 2K

Top Coat

Aliphatic polyurethane enamel (gloss)
Use: metal structures, machinery, doors, etc.
ENAMEL S-R TR-P
+
CATALYZER

2-component solvent-based aliphatic polyurethane enamel, catalysed with aliphatic polyisocyanate. Non-yellowing.
Use: metal structures, machinery, doors, etc.
POLYURETHANE ENAMEL 2K

WATER BASED PRODUCTS

One-component products

Primer

Multi-purpose water-based primer with zinc phosphate as corrosion inhibiting pigment.
Use: iron, galvanised, aluminium, zinc, PVC, some plastics, etc.
PRIMER POLYVALENT AQUA

All-purpose water-based primer for interior and exterior use.
Use: galvanised, aluminium, glass, tile, vitrified terrazzo, PVC, some plastics, etc.
PRIMER HIGH ADHESION

Rust passivator for iron and steel. It neutralises the corrosion process and reacts quickly with residual iron oxide to transform it into a stable metal-organic complex which will be ready for painting after reaction.
RUST CONVERTER

Top Coat

Alkyd enamel with polyurethane. It combines hardness and flexibility (gloss).
Use: doors, railings, windows, etc.
ALBOR AQUA

Fast drying polyurethane enamel, combines hardness, chemical resistance and flexibility (satin and matt).
Use: doors, railings, windows, etc.
ALBORLAC AQUA

Water based acrylic enamel. Combines hardness, flexibility and fast drying (matt).
Use: doors, railings, windows, etc.
ALBOR ACRYLIC AQUA

WATER BASED PRODUCTS

Two-component products

Primer

Anticorrosive primer for ferrous and non-ferrous surfaces, indoors and outdoors uses.
Use: iron, galvanised, aluminium, zinc, etc.

EPOXY PRIMER 2K AQUA

Top Coat

2-component waterborne aliphatic polyurethane enamel, catalysed with aliphatic polyisocyanate, for the protection of metal structures.
Use: metal structures, machinery, doors, etc.

DECOPUR AQUA 2K
